About This Data

- New Florida residents must obtain a valid Florida driver license within 30 days of establishing Florida residency
- The Florida Department of Highway Safety and Motor Vehicles (FLHSMV) tracks the state of origin of these applicants
- FLHSMV provides the number of total exchanges by origin state and destination county
- These statistics do not necessarily lend insight to the number of in-migrating home buyers versus renters, but...
- ...they do give us a better sense of *recent* patterns of migration to Florida than many other data sets can
- The tables in this document compare the annual number of license exchanges over the past year (2023) to the average annual number of license exchanges observed during the pre-pandemic years 2016-2019
- Note that all figures displayed in the tables are rounded to the nearest whole number (or percent in the last column), and as a result, the values reported in the last two columns—while correct—may not always appear to line up exactly with the average annual figures reported in the first two columns (especially when the average annual figures are small)
